

Smart FACEMATCH

DO IDENTIFICATION CARD AND PERSON MATCH?

Document checking

Smart FACEMATCH helps you to match a person to an ID, but how do you know if the ID is not faked?

With our mobile document checking device Doculus Lumus® you can find out within 30 seconds whether it is a fake.

Smart FACEMATCH

Check IDs

Less time

Not sure if ID and
person are
identical

Simple, effective
checking

Smart FACEMATCH

Characterizes the face with
two markers on the bridge
of the nose and the chin

Recognizes the face despite
changes such as a beard or
another hairstyle

Identifies people in just a few
simple steps

App available for iOS and Android

**Match a person
to their ID**

**Match a person
to their ID**

Step 1 of the application

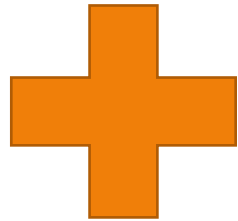

Take a photo of the ID and
the face of the person

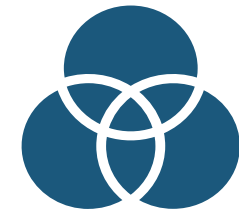

App automatically searches
for the face

Step 2 of the application

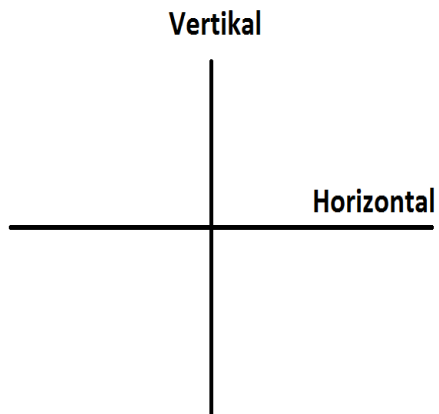

Smart FACEMATCH automatically sets facial markers at the bridge of the nose and the chin, these can be adjusted if necessary.

Face halves for comparison are now side by side

Step 3 of the application

The faces can be compared horizontally or vertically using a slide bar, the division can be moved.

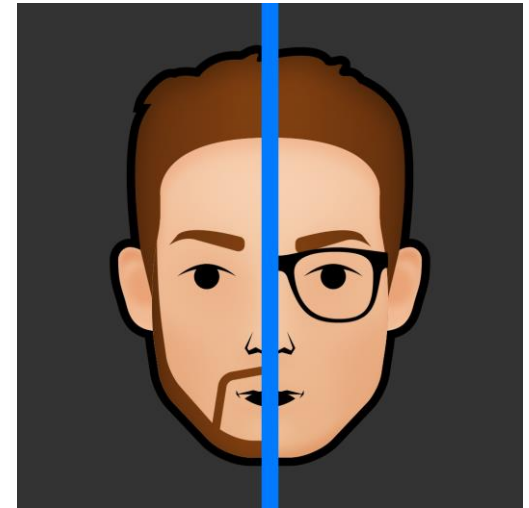

The faces can also be superimposed with adjustable transparency.

Smart FACEMATCH instead of FaceMatch

FaceMatch was optimized after numerous downloads and feedback from our customers and developed into Smart FACEMATCH.

More precise setting of the face markers leads to considerable time savings..
